

FABRICATIONS

Our flexibility in manufacturing capabilities and expertise allows us to design and fabricate any number of products to suit the ever-changing demands of the industry.

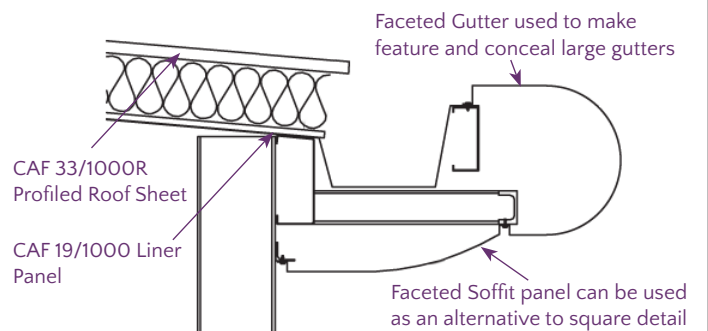

Here are a few examples:

BULLNOSE

Bullnose Fabrications are manufactured to meet customers' individual requirements. They can be finished in any colour to match or complement existing components.

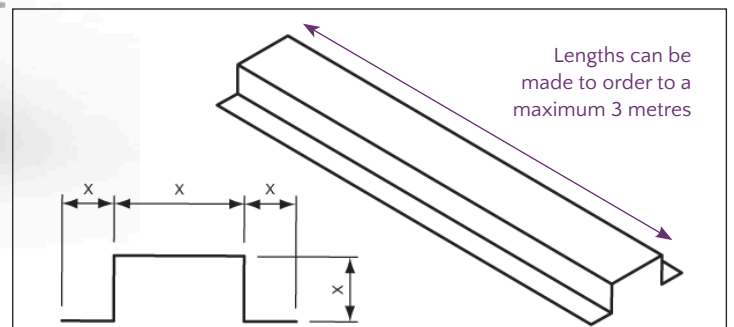

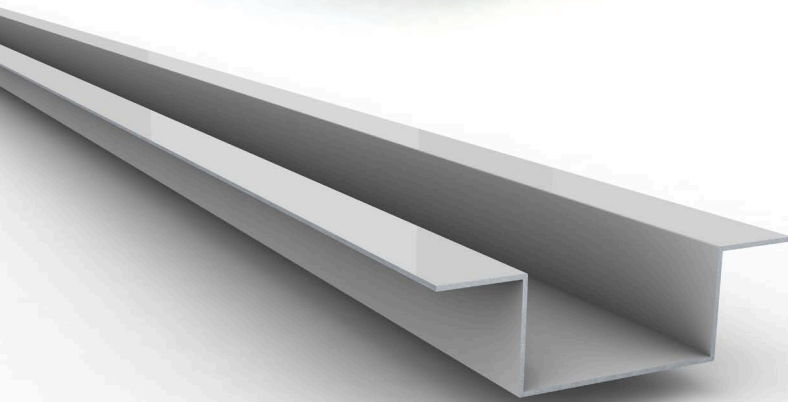

Examples of Bullnose Applications

TOP HAT

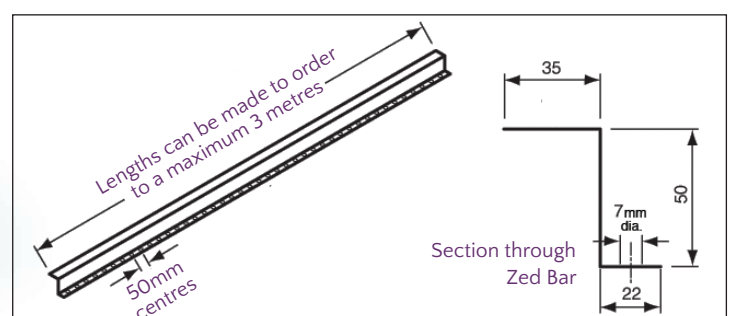

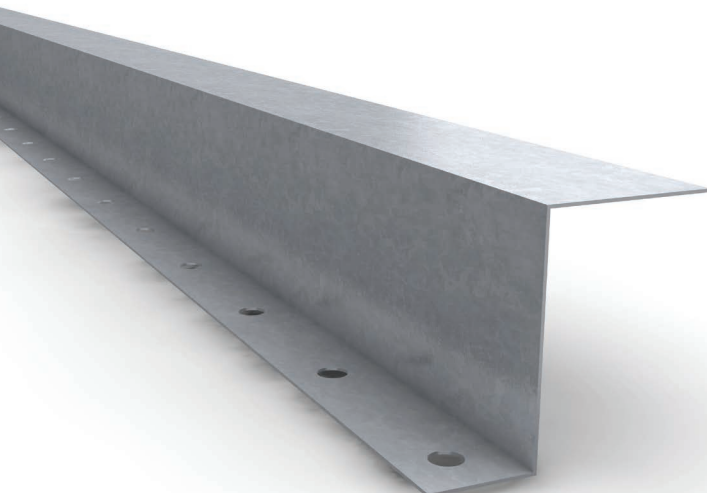

We fabricate top hat profile sections for construction, commercial and industrial applications and are made to the highest specification in a variety of materials and finishes.

Typically made from 1.5 or 2.0mm galvanised material cut to order up to a maximum of 3 metre lengths.

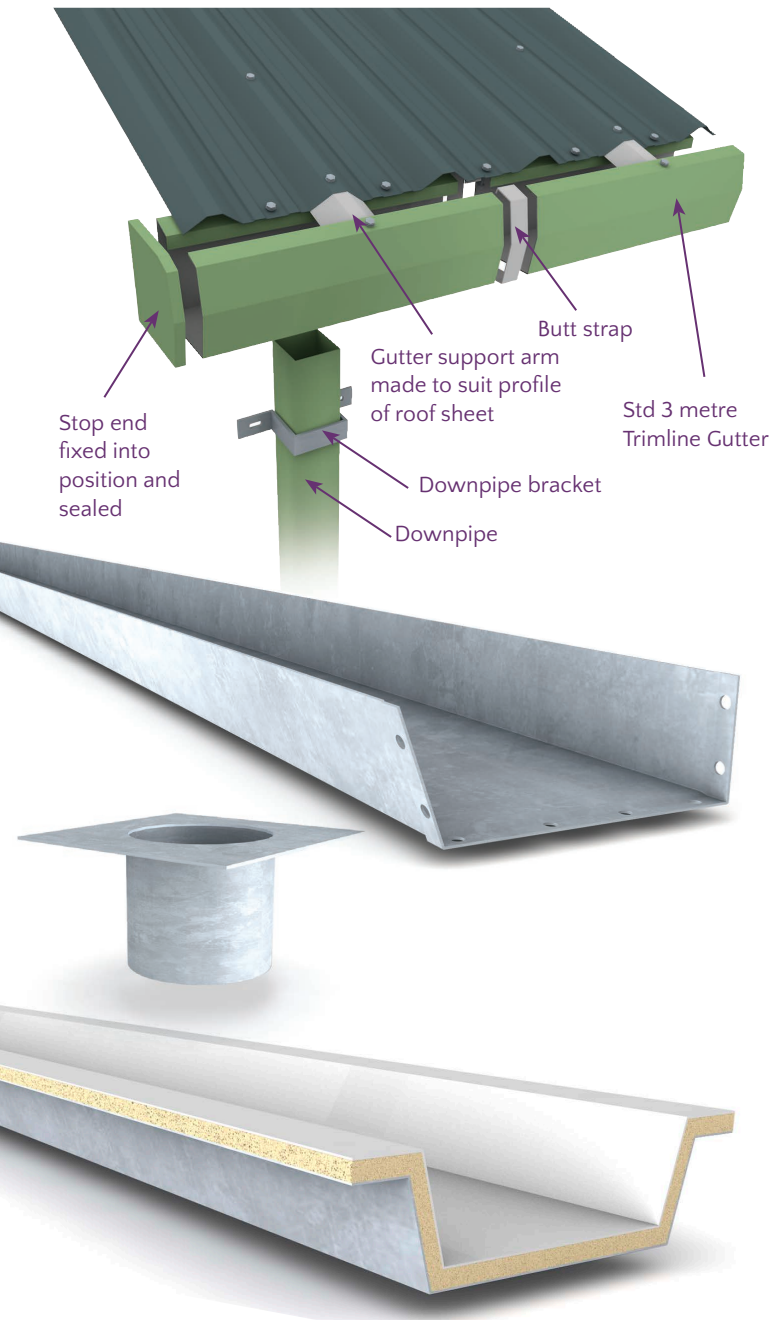

ZED BARS

Zed Bars are manufactured to meet customers' individual requirements. Standard Zed Bars are supplied in 3m lengths.

GUTTER PRODUCTS

We fabricate a range of gutters including butt straps, stop ends, gutter support arms, outlets and rainwater pipes to customers' requirements. Here are a few examples:

TRIMLINE GUTTER

The trimline gutters are made in 0.7mm plastisol and the maximum length is 3 metres.

GALVANISED GUTTERS

Galvanised Box Gutter, Valley and Boundary Wall Gutters are manufactured in 3 metre lengths (cover width 2950mm) to customers required dimensions.

- Punched and joggled joints make installation easier
- Loose or welded stop ends with weir if required
- Loose or welded Outlets

INSULATED GUTTERS

Insulated gutters consisting of an outer galvanised skin, a rigid insulation core and an internal steel white liner. These can be made from 1.5 or 2mm galvanised steel.

DOWN PIPE FLASHINGS

Down Pipe Flashings are manufactured to meet customers' individual requirements.

FIXTURES

All accessories – bolt sets/clip nuts and mastic are supplied as standard.
